

SCIENCE

This term we will be focusing on space, with a link to the moon phases, our solar system and the Earth.

The children will be taking part in a visit from the Space Dome team, where by the children will get to experience the earth and beyond, with the use of 3D technology.

We will also make as many cross curricular links as possible, in order for the children to get a fully immersive experience into the subject area.

PSHE

This term we will be discussing and learning about who decides important decisions which affect our daily lives .

MUSIC

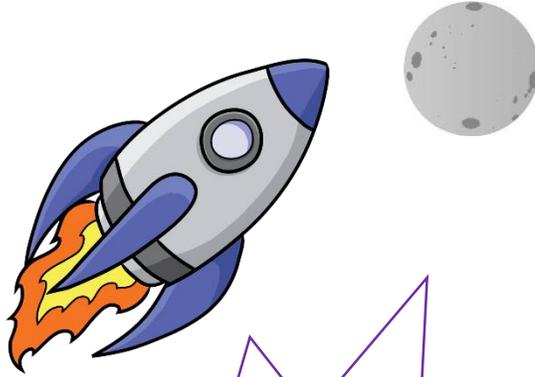

We will be learning about the musician Holst and discovering his musical pieces linking to the Planets. They will also be linking this subject to the moon landing and creating a soundtrack.

ICT

This term, we will be creating space quizzes using Scratch incorporating our knowledge and understanding of our main theme.

FRENCH

We will now be focusing on sentence level work both through role-play and written exercises.

Year 5 Spring Topic Web

ENGLISH

We are linking our science theme to our English work as much as possible this term beginning with looking at non-fiction explanation texts.

We will then move on to narrative using Mr Wuffles (a wordless picture book) to inspire a first-person story focusing on perspectives.

In addition, we shall also look at the genre of biographies and poetry linked to space.

PE

Our PE focus will include swimming and team games including dodgeball.

GEOGRAPHY

We will be learning more about the country we live in, as well as focusing on some of the counties which surround our local area. The children will also get to use Google Earth and consider what issues are currently facing the UK.

ART

In art we will be creating space themed scenes using a variety of materials including pastels and marbling techniques.

RE

We will be learning about Jesus' teachings with a link to Easter. This will also form the basis of the Year 5 Easter service.
